### **DETAILED ACTION**

The following detailed action is in response to the correspondence filed 3/30/2006.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cynthia Nicholson (36,880) on 6/8/2006.

The application has been amended as follows:

In claim 1, line 2, "for containing the electronic circuit" has been amended to read - - for containing an electronic circuit - -.

In claim 1, line 8, "arranged on the outer side" has been amended to read - - arranged on an outer side - -.

In claim 3, line 2, "connected to a member at ground potential" has been amended to read - - connected to a ground member - -.

In claim 5, line 2, "with that part" has been amended to read - - with a part - -.

In claim 7, line 1, "An electronic circuit housing according to claim 7" has been amended to read - - An electronic circuit housing according to claim 6 - -.

In claim 9, line 2, "the electronic circuit" has been amended to read - - "an electronic circuit - -.

In claim 9, line 6, "for connecting to an electronic circuit" has been amended to read - - for connecting to the electronic circuit - -.

In claim 10, line 2, "with that part of said electric compressor" has been amended to read - - with a part of an electric compressor - -.

In claim 10, line 3, "said compression mechanism" has been amended to read - - a compression mechanism - -.

***Allowable Subject Matter***

2. Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 9, the allowability resides in the overall structure of the device as recited in independent claims 1, and 9 and at least in part because claims 1 and 9 recite, "bus bars that are insert-molded in said circuit housing", "a conductive plate that is insert-molded in said circuit housing surrounding said space and arranged on an outer side of said bus bars", and "a lower end where the metal motor housing is placed".

The aforementioned limitations in combination with all remaining limitations of claims 1, and 9 are believed to render said claims 1, and 9 and all claims dependent therefrom (2-8 and 10-12 respectively) patentable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

3. Applicant's arguments, see pages 7-10, filed 3/30/2006, with respect to claims 1-12 have been fully considered and are persuasive. The rejection of said claims has been withdrawn.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
